

Terrestrial Biomes	Where can you find them?	Describe the climate.	Is the soil fertile (can it grow plants easily)	What does it look like?	3 Animals found there	3 Plants found there	Interesting Fact
Grassland/ Savannah	Africa, middle of USA	2 seasons Wet + dry	Yes!	Lots of grass, scattered trees	Zebra, elephant, lion	baobab tree, lemon grass, acacia tree	
Tropical Rainforest	Around and near the equator	Wet humid, wet, hot	the soil is too wet to be fertile	dense trees, 3 layers, very green	birds, Snakes, tree frogs	vines, ferns, moss	
Deciduous Forest	Canada, China, Japan, Eastern U.S.A.	4 seasons spring, summer, winter, fall	some- what	bushes, trees around, ferns, leaf litter	red fox, Cardinal, raccoons	maple tree, Oak tree, moss	

Aquatic Biomes	Fresh or Salt Water?	Where can you find it?	Describe the water temperature.	What does it look like?	3 Animals found there	3 Plants found there	Interesting Fact
Estuary	Mix! depends on the tide	where a river and ocean meet	Warm	marshy area between a river and ocean	Clams, snails, crabs	marsh grass, cattails, algae	
Ocean: Deep ocean	salt	Very bottom of the ocean	Cold	Very dark, not a lot of plant life	eels, sea anemones	not many	
Coral Reef	salt	shallow part of ocean	Warm	colorful, sunny	Sea urchins, octopuses, fish	sea weed, sea grass	
Lakes	fresh water	normally surrounded by woods	can be cold if it is a big lake	larger body of water with trees	plankton, fish, frogs + turtles near surface	algae	
Ponds	fresh water	smaller collection of water around grasses	Warm	smaller body of water with grasses	turtle, beaver, fish	algae, cattails, marsh grass
